Date	Oct 2012 amended Dec 2014

Notification Chain

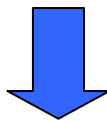

Environment Agency Calls FASTCON

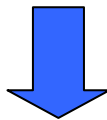

Multi-agency. During working hours Borough or District Councils informed and invited to participate.

SLACCU Duty CCO represents all LA's out of working hours and will inform Duty Director of Public Health

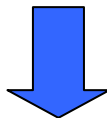

Police identify SILVER (TCG) Location

On completion of FASTCON, Duty CCO will inform internal departments and external authorities and agencies (as required) of actions required.

Evacuation and Rest Centre plans activated as necessary

Recovery Plans Activated,

Summary of Emergency Response Stages

Pre-incident Severe Weather and Flood Alerts and Warnings	<ul style="list-style-type: none"> In working hours, information passed to other departments and authorities. Lead Officers identified. 	<ul style="list-style-type: none"> Out of working hours Duty CCO follows procedures in SI
Risk of Flooding identified by EA	<ul style="list-style-type: none"> EA initiate FASTCON 	<ul style="list-style-type: none"> Duty CCO checks DPH aware and District Councils
Co-ordination of the Multi-agency response	<ul style="list-style-type: none"> Police Lead

Introduction

This Plan deals with flood emergencies that are of a scale that cannot be dealt with by the Emergency Services, Local Authorities and other agencies as part of their normal day-to-day operations. The Plan provides the framework for responding to all forms of major flooding events across the County. Because of the potential scale of flooding, and the consequential effect on large numbers of homes and people, the Plan detail concentrates on six specific sites that have been identified by the Environment Agency as needing specific plans.

Flooding is a widespread occurrence in Somerset, the public have their part to play in acknowledging the risk to their property and taking preventative measures to minimise the effects of flooding on their premises.

In large scale, perhaps countywide flooding emergencies, residents and small communities will not be able to rely on the Emergency Services and others for responding to their immediate needs. In these circumstances residents are encouraged to develop a local community self help plan for themselves.

Aim

The Plan provides an overview of tactical and operational of actions, roles and responsibilities specific to flooding in the County of Somerset, and details the multi-agency operational response. This Plan includes information referenced from the Avon & Somerset Local Resilience Forum (LRF) Multi Agency Flood Plan to produce a framework of procedures to facilitate a co-ordinated multi-agency response to flooding within the County boundary.

Objectives

- To provide clear definitions of roles, responsibilities and actions of each agency at particular stages of a response.
- Set out multi-agency command and control arrangements at each level of response.
- Identify lead officers as part of the response and recovery process.

LINKS TO OTHER PLANS

This plan should be used in conjunction with the following plans:

- A&SLRF OPLINK Partner Teleconference
- A&S LRF Multi-agency Flood Response Plan
- A&S LRF Major Incident Response Guide
- A&S LRF Recovery Guide
- A&S LRF Evacuation and Shelter Plan
- A&S LRF Search and Rescue Plan
- EA Local Flood warning Plan for Somerset and the Avon Authorities
- Somerset County Council, Borough or District Corporate Emergency Response and Recovery Plans
- Somerset Large Scale Evacuation Plan
- The Rest Centre Management Guide
- Respective Communications and Media Plans

Major Flood Risk Sites

While flooding is a regular occurrence within Somerset, the Environment Agency flood risk assessment highlights 6 sites where there is a need to have a specific flood response plan. These sites are identified either because of their potential for large numbers of people to be at risk in a single location, or where there is such a short time between warning and actual flooding that affected communities and responding agencies need to react immediately.

Location	Flood Alert Area & Code	Flood Warning Code	Flood Warning Area	Part/ Annex
Taunton Town Centre	River Tone Catchment (112WAFR TC)	112FWFTON20A	River Tone at Taunton, riverside properties	
		112FWFTON20B	River Tone at Taunton, low lying properties set back from the river	
		112FWFTON20C	River Tone at Taunton, other properties set back from the river	

Bridgwater	Somerset Coast at Minehead, Bridgwater, Burnham-on-Sea, Portishead and Uphill to Kingston Seymour (112WATS OM3)	112FWTBRI01	Tidal River Parrett at Bridgwater, Manley Gardens and East Quay areas	
		112FWTBRI02	Tidal River Parrett at Bridgwater, Taunton Road, Robins Road and Bristol Road Business Park areas	
		112FWTBRI03	Tidal River Parrett at Bridgwater, Moorland, Burrowbridge and Stathe	
Burnham-on-Sea, Brean & Highbridge		112FWTBUR01	Somerset coast at Burnham-on-Sea, seafront properties	
		112FWTBUR02	Somerset coast at Burnham-on-Sea, properties located behind the seafront	
		112FWTBUR03	Somerset coast at Burnham-on-Sea, Huntspill, Highbridge and Berrow	
		112FWTBRE01	Somerset coast at Brean, Brean Down Cove area	
		112FWTBRE02	Somerset coast at Brean, Red Road and Weston Road areas	

		112FWTBRE03	Somerset coast at Brean and Lympsham_	
Minehead		112FWTMIN01	Somerset coast at Minehead, seafront properties	
		112FWTMIN02	Somerset coast at Minehead, properties located behind the seafront	
		112FWTMIN03	Somerset coast at Minehead, Marsh Common and Seaward Way areas	
Bruton	East Somerset Rivers (112WAFT ESR)	112FWF3D0B	River Brue (Upper) at Bruton Town	
Ilchester	River Yeo and River Parrett, Lower Reaches (112WAFR YP)	112FWF3C2F	River Yeo at Ilchester	

Roles and Responsibilities

The roles and responsibilities of agencies and authorities are defined in the A&S LRF MIRG.

In basis terms they are:

- Police: Coordination of Response Phase, protection and saving of life.
- Fire Service: Search and Rescue, may assist with notification of at risk communities.
- Ambulance: Triage of casualties, transport of medically vulnerable people.

- Health: Provide clinical response and general support and specialist healthcare during response and recovery phases.
- Local Authorities: Support to Emergency Services, Traffic Management, Transport during evacuation and establishment of Rest Centres. Lead Recovery Phase.
- Environment Agency: Flood warning, defensive work where appropriate, notification of at risk communities.
- Highways Agency: Management of major route network, route closures, clearing debris from route network, signage, repairs
- Utilities: Identification of at risk critical infrastructure.
- Animal Health: Advice to farmers regarding livestock and links to Animal Charities
- Voluntary Agencies: Support to Local Authorities

Other Organisations that may be involved:

- Transport industry, including train operators and Network Rail.
- British Transport Police
- Civil Nuclear Constabulary
- Pipeline operators
- UK Search and Rescue
- Maritime and Coastguard Agency
- Community Groups, Flood Warden schemes
- NFU

Sources of Flooding

River (Fluvial) Flooding

- A river bursting its banks leading to flooding is usually caused by prolonged periods of heavy rainfall (or melting snow). Fluvial flooding can be both deep and high velocity, depending on the nature of the river catchment. The area affected by fluvial flooding has been mapped by the Environment Agency.
- Within Somerset, due to the topography of the flood plain areas there is little difference between the extent of flood zones 2 and 3. The total number of properties at risk from river flooding is 5, 412.
- The Environment Agency will monitor and warn for river (fluvial) flooding where systems and procedures are in place,

Tidal & Coastal Flooding

- The combination of high astronomical tides and adverse weather conditions can cause storm surge and wave overtopping of defences. In severe events this may result in the breach of sea defences and inundation of the surrounding area.
- Risk to life can be high with the potential for people being caught in fast flowing waters and currents adding to the usual risks associated with flooding. In vulnerable areas there is potential for significant damage to property from high-energy waves.
- At risk communities along the Somerset coast are largely defended to at least a 1 in 200 year standard. There are 16,415 properties at risk from a 1:1000 year event (Flood Zone 2).

Surface Water Flooding

- Surface water flooding happens where drainage systems are unable to cope with heavy spells of rainfall, are blocked or damaged. In rural areas it will be most problematic when catchments are already saturated or the ground hard due to lack of rain or frozen and in urban areas with impermeable surfaces. It will usually occur rapidly, but be relatively short lived.
- Accurately predicting and mapping surface water flooding is currently being progressed by DEFRA and the EA. DEFRA has identified 104 settlements (17,060 properties) within Somerset that are at risk of surface water flooding. The Extreme Rainfall Alert Service provides the best available information for warning of potential surface water flooding to Category 1 and 2 Responders, but is unable to provide a specific location but will endeavour to provide a geographic area. Affected communities will largely rely on their local understanding of the most commonly affected areas.

Reservoirs Breach

- This refers to a collapse of a reservoir dam, there are a number of reservoirs within the Somerset area and these could cause flooding if a collapse occurred. Flooding from these would be instantaneous with significant movement of debris (including vehicles) and sediment. It is likely that there will be little or no warning, and the impact is likely to be devastating to anything in the floods wake. In Somerset there are currently 11 identified Category A Reservoirs¹ (over 25,000m³), which may require emergency plans. Reservoir Emergency Plans are separate to this Plan and not considered further. A list of major Reservoirs is at Annex I

Groundwater Flooding

- Groundwater flooding is the result of a rise in the water table to above the rock or soil that makes up the land surface. The problem is most common in areas with chalk strata but can occur in any area with underlying permeable deposits, including sands and gravels. Somerset is not at significant risk from this type of flooding and is not considered further in this Plan.

Critical Infrastructure

Maps are included at Annex J of the sites that are regarded as Critical Infrastructure within Somerset. They include Health Sites and should be identified early in the FASTCON to ensure that appropriate measures are taken for either their protection or evacuation.

Generic Response

The Response Phase will be led and co-ordinated by the Police.

¹ Under the Reservoirs Act, 1975, Category A Reservoirs are large raised reservoirs where a breach will endanger at least 10 lives in a community and cause extensive property damage. Flood and Water Management Act 2010

Actions:

Serial	Action	Authority
1	Identification of 'at risk' sites and communities	EA/LA/Police
2	Notification of site managers and communities of the risk	EA/LA/Police (other agencies as required)
3	Decision regarding evacuation and temporary housing	LA/Health/Police
4	Identification of Evacuation Assembly Points	EA/LA/Ambulance/Police
5	Identification of Rest Centres and places of safety	LA/Police
6	Arrangement of transport	LA/Ambulance/Police
7	Establish Rest Centres etc.	LA/Health/Police
8	Recovery	LA/Health

Triggers and Response

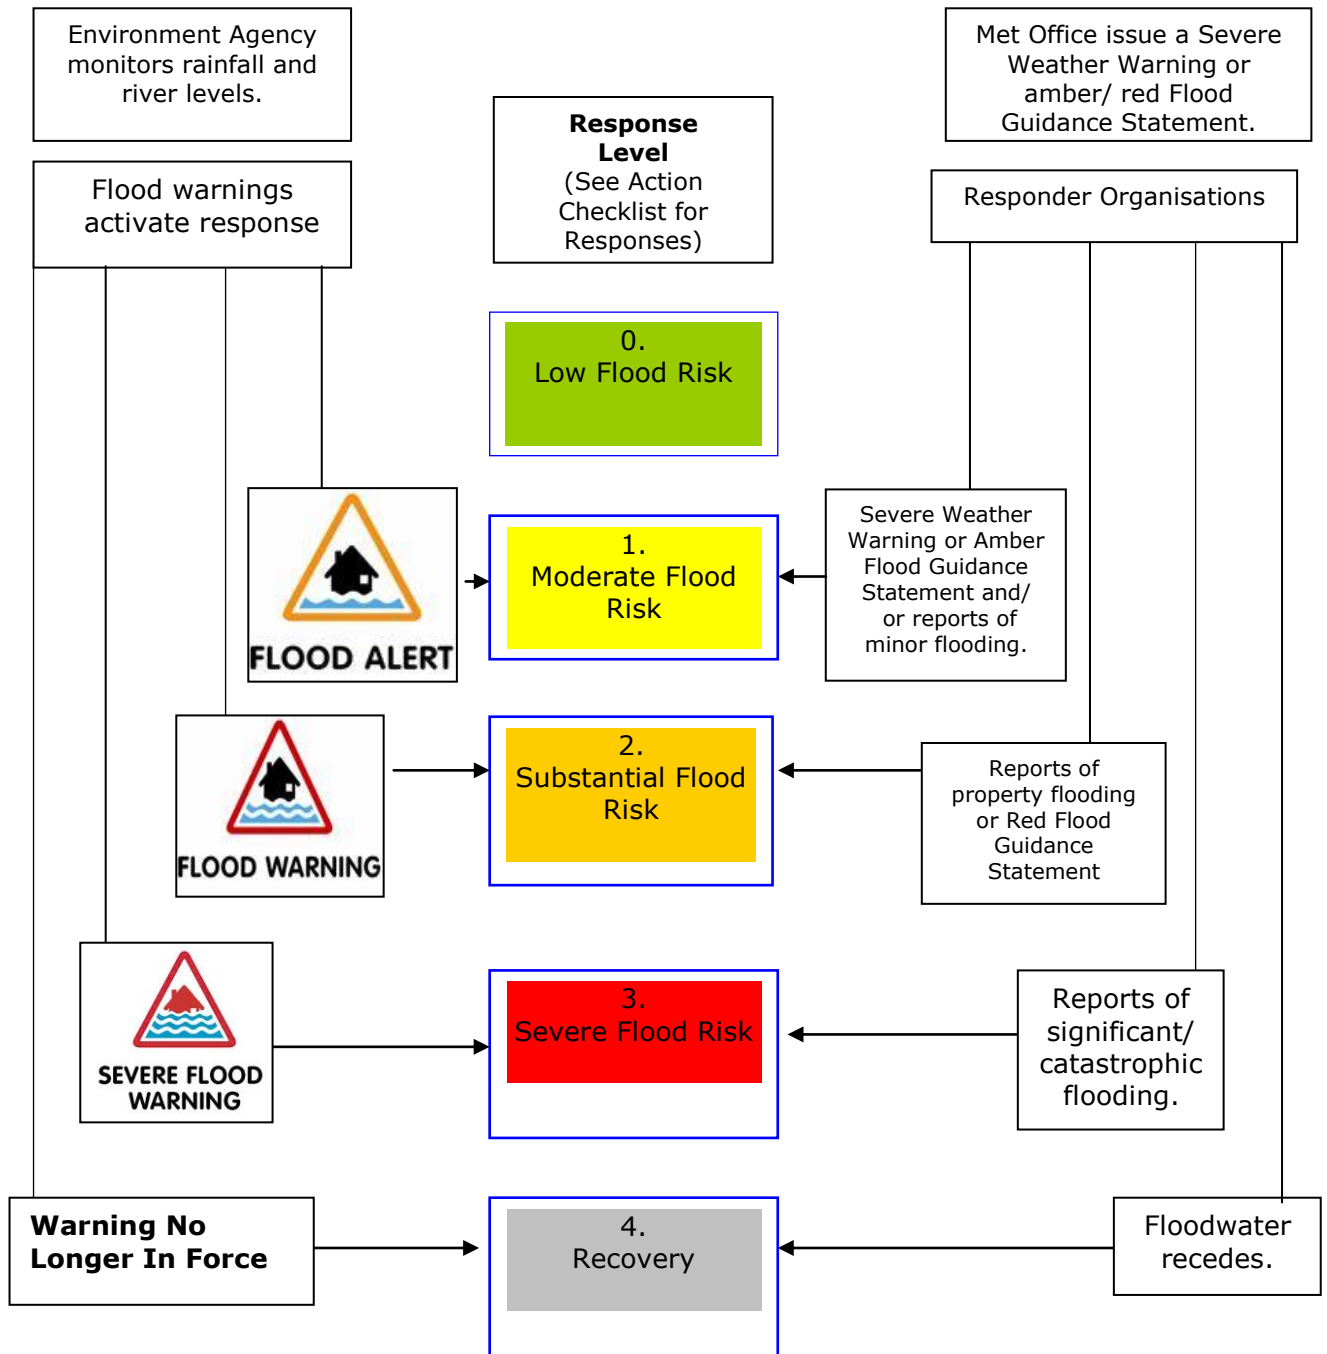

Response Level	Trigger	Actual or forecast Impact
0. (Low flood risk)	No flood warning / alerts and / or no warnings of severe weather in force that may result in flooding.	No flooding occurring
1. (Moderate flood risk)	Flood alerts in force, <u>And / or</u> Warnings of severe weather in force that may result in flooding <u>And / or</u> Reports of minor impact flooding.	Low impact flooding of fields, gardens and minor roads.
2. (Substantial flood risk)	Food Warnings in force, <u>And / or</u> Severe Weather Warnings in force that are likely to result in flooding <u>And / or</u> Reports of property flooding.	As level 1, plus: <ul style="list-style-type: none"> • Flooding of homes • Flooding of Businesses • Flooding of major road infrastructure • Flooding of rail infrastructure • Significant wave/ spray overtopping on coasts • Significant Flood Plain inundation • High risk to caravan and campsites • Potential damage to flood defences
3. (Severe flood risk)	Severe flood warnings or multiple Flood Warnings in force, <u>And / or</u> Warnings of severe weather in force that are highly likely to result in flooding <u>And / or</u> Reports of significant, catastrophic flooding.	As level 2, plus: <ul style="list-style-type: none"> • Large numbers (100+) properties expected to flood within the LRF area. • Large numbers of people affected • High risk to life • Severe adverse impact on local infrastructure • Severe impact on the capacity of responders • Potential flood defence failures/ overtopping
4. (Recovery)	Flood warnings / severe flood warnings downgraded <u>And / or</u> Warnings No Longer in Force <u>And / or</u> No warnings of severe weather in force that may result in flooding	Flood water receding.

Triggers

Triggers to Flooding for Environment Agency

Triggers in areas covered by the Flood Warning service

Triggers in areas not covered by the Flood Warning service

Response by Local Authority/Multi-agencies

Response Level	Trigger	Actual or forecast Impact	Action
0. (Low flood risk)	No flood warning / alerts and / or no warnings of severe weather in force that may result in flooding.	No flooding occurring	No specific response, normal awareness of possible flood risk.
1. (Moderate flood risk)	EA Flood alerts in force, <u>And / or</u> Met Office and Flood Forecasting Centre Yellow Warnings of severe weather in force that may result in flooding <u>And / or</u> Reports of minor impact flooding.	Low impact flooding of fields, gardens and minor roads.	<ul style="list-style-type: none"> ▪ Consider activation of plans and procedures in response to flooding ▪ Carry out routine or preparatory responses as defined in single agency plans ▪ Individual agencies to consider staff availability ▪ Maintain a heightened awareness of flood risk
2. (Substantial flood risk)	EA Flood Warnings in force, <u>And / or</u> Met Office and Flood Forecasting Centre Amber Severe Weather Warnings in force that are likely to result in flooding <u>And / or</u> Reports of property flooding.	As level 1, plus: <ul style="list-style-type: none"> • Flooding of homes • Flooding of Businesses • Flooding of major road infrastructure • Flooding of rail infrastructure • Significant wave/ spray overtopping on coasts • Significant Flood Plain inundation • High risk to caravan and campsites • Potential damage to flood defences 	As for level 1, plus: <ul style="list-style-type: none"> • All responders to provide appropriate attendance to FastCon teleconference. <p>LA Actions</p> <ul style="list-style-type: none"> ▪ Identify Lead Authority ▪ Road Closures (Police & Highways) ▪ Checks on Vulnerable groups and provision of care support. <ul style="list-style-type: none"> ▪ Schools ▪ Infrastructure ▪ Information to public (Multi-agency) ▪ Place Voluntary Agencies on standby ▪ Identify Rest/Evacuation Centres <p>Local Authority to consider activation of the Recovery Co-ordination Group (RCG)</p>

<p>3. (Severe flood risk)</p>	<p>Severe flood warnings or multiple Flood Warnings in force, <u>And / or</u> Met Office and Flood Forecasting Centre Red Warnings of severe weather in force that are highly likely to result in flooding <u>And / or</u> Reports of significant, catastrophic flooding.</p>	<p>As level 2, plus:</p> <ul style="list-style-type: none"> • Large numbers (100+) properties expected to flood within the LRF area • Large numbers of people affected • High risk to life • Severe adverse impact on local infrastructure • Severe impact on the capacity of responders • Potential flood defence failures/ overtopping 	<p>As for level 2, plus:</p> <ul style="list-style-type: none"> • Responder Control Centres open <ul style="list-style-type: none"> ▪ Activate Police Led multi-agency co-ordination ▪ Declare Major Incident ▪ All responders to provide appropriate representation at Multi-agency control centres (Tactical and Strategic Co-ordination Centre) ▪ Relevant responders to support multi-agency media arrangements ▪ Local Authority activate RCG
<p>4. (Recovery)</p>	<p>Flood warnings/severe flood warnings downgraded <u>And/or</u> EA Warnings No Longer in Force <u>And/or</u> No Met Office and Flood Forecasting Centre warnings of severe weather in force that may result in flooding</p>	<p>Flood water receding.</p>	<p>Recovery phase which may have been implemented earlier now Local Authority coordinating/leading or LRF wide recovery.</p>

TAUNTON TOWN CENTRE

1. General

- Taunton Deane Borough Council is the “lead” Local Authority when this Plan is implemented.
- The flood plain is Taunton Town Centre threatened by the River Tone.

2. Potential Locations for Silver Control

Avon & Somerset Constabulary, on consultation with the Environment Agency, will designate a Silver Control location. Potential sites are:

SILVER	OS Sheet	Grid Reference	Remarks
Taunton Police Station Shuttern	193	ST 22412420	

3. Traffic Management – Location of Signage

SCC Highways will mobilise Skanska (the Service Provider) to deploy traffic management signage to pre-designated locations and adjust the layout plan as the flood situation develops:

Grid Reference	Location	Sign
ST205 263	Cross Keys in advance of Silk Mills Roundabout	Town Centre Closed Flooding Diversion ←North Taunton
ST214 260	Staplegrove Road Junction with Greenway Road	Town Centre Closed Flooding Diversion →South Taunton
ST217 256	Staplegrove Road Junction with Bindon Road	Town Centre Closed Flooding
ST226 255	Kingston Road Junction with Cheddon Road	Town Centre Closed Flooding
ST235 251	Priory Avenue at Wicks Roundabout	Town Centre Closed Flooding
ST220 244	Castle Street Junction with Wellington Road	Town Centre Closed Flooding
ST224 244	Tower Street Junction with Park Street	Town Centre Closed Flooding
ST227 245	North Street by Parade	Town Centre Closed Flooding

ST230 247	Cannon Street just North of Car Park entrance	Town Centre Closed Flooding
-----------	---	-----------------------------

4. Evacuation Planning – Flood Zones with Associated Roads and Postcodes.

Zone 1:

Street Name	Post Code	Street Name	Post Code
Albemarle Road	TA1 1BA	Portland Street	TA1 1UZ

5. Provisional Rest Centres

District/Borough	MIP Site	Provisional Rest Centres
Taunton Deane	Taunton Town Centre	Castle Community School, Taunton Bishop Fox Community School Taunton St Augustine of Canterbury School, Taunton Ladymead Community School, Taunton

6. Major Incident Plan Maps

The Environment Agency has produced maps indicating the

populated area that could become flooded. Where appropriate the floodplain is divided in to Zones. Each Zone takes approximately one hour to tour with a public broadcast system to warn residents of impending flood. The following maps are included:

- Taunton All Zones
- Taunton Zone 1
- Taunton Zone 2
- Taunton Zone 3

BRIDGWATER**1. General**

- Sedgemoor District Council is the “lead” Local Authority when this Plan is implemented.
- The flood plain is Bridgwater threatened by the River Parrett (Tidal).

2. Potential Locations for Silver Control

Avon & Somerset Constabulary, on consultation with the Environment Agency, will designate a Silver Control location. Potential sites:

SILVER	OS Sheet	Grid Reference	Remarks
Bridgwater Police Station Express Parkway	182	ST 306392	

3. Traffic Management – Location of Signage

SCC Highways will mobilise Skanska (the Service Provider) to deploy traffic management signage to pre-designated locations and adjust the layout plan as the flood situation develops:

Grid Reference	Location	Sign
ST 287 372	A39 Southern end of Northern Distributor	Road Closed Flooding
ST 300 367	A38 approach to A39 Junction	Road Closed Flooding
ST 302 344	A38 Dawes Farm	Road Closed Flooding
ST 384 322	A372 Junction from A361	Road Closed Flooding
ST 314 413	Dunball exit A39 To Bridgwater, Bath Road	Road Closed Flooding
ST 330 399	From A39 Junction Silver Fish	Road Closed Flooding

4. Evacuation Planning – Flood Zones with Associated Roads and Post Codes.

5 Provisional Rest Centres

District/Borough	MIP Site	Rest Centres
Sedgemoor	Bridgwater	Decision will be taken at the time, depending on the size of the flood incident. Possible that SDC will have to request mutual aid from other District/Borough Councils.

6. Major Incident Plan - Maps

The Environment Agency has produced maps indicating the populated area that could become flooded. Where appropriate the floodplain is divided in to Zones. Each Zone takes approximately one hour to tour with a public broadcast system to warn residents of impending flood. The following maps are included:

- Bridgwater All Zones
- Bridgwater Zone 1
- Bridgwater Zone 2
- Bridgwater Zone 3
- Bridgwater Zone 4

- Bridgwater Zone 5
- Bridgwater Zone 6

ANNEX C

BURNHAM-ON-SEA, BREAN AND HIGHBRIDGE

1. General

- Sedgemoor District Council is the “lead” Local Authority when this Plan is implemented.
- The flood plain is an extensive area covered by Burnham-on-Sea, Brean and Highbridge that would be caused by tidal flooding.

2. Potential Locations for Silver Control

Avon & Somerset Constabulary, on consultation with the Environment Agency, will designate a Silver Control location. Potential sites:

SILVER	OS Sheet	Grid Reference	Remarks
Bridgwater Police Station Express Park	182	ST 306392	

3. Traffic Management – Location of Signage

SCC Highways will mobilise Skanska (the Service Provider) to deploy traffic management signage to pre-designated locations and adjust the layout plan as the flood situation develops:

Grid Reference	Location	Sign
ST 342 448	Withy Road off B3141	Road Closed Flooding
ST 343 454	New Road off B3141	Road Closed Flooding
ST 326 471	B3139 at Junction with Mark Road	Road Closed Flooding
ST 335 492	B3140 Junction with A38 (Edithmead Roundabout)	Road Closed Flooding
ST 335 490	A38 South of Edithmead Roundabout	Road Closed Flooding
ST 340 498	Brent Knoll turning at White Cross off A38	Road Closed Flooding
ST 347 519	B3140 Junction with A38 to Brent Knoll (Brent Road)	Road Closed Flooding
ST 340 545	Lympsham turning off A38	Road Closed Flooding
ST 405 536	A38 West of Lower Weare	Road Closed Flooding

4. Evacuation Planning – Flood Zones with Associated Roads and Postcodes

Sedgemoor	Bridgwater Burnham-on-Sea, Brean &	Decision will be taken at the time, depending on the size of the flood plain. Possible that SDC will have to

	Highbridge	request mutual aid from other District/Borough Councils.
--	------------	--

6. Major Incident Plan - Maps

The Environment Agency has produced maps indicating the populated area that could become flooded. Where appropriate the floodplain is divided in to Zones. Each Zone takes approximately one hour to tour with a public broadcast system to warn residents of impending flood. The following maps are included:

- Burnham-on-Sea, Brean and Highbridge All Zones
- Burnham-on-Sea, Brean and Highbridge Zone 1
- Burnham-on-Sea, Brean and Highbridge Zone 2
- Burnham-on-Sea, Brean and Highbridge Zone 3
- Burnham-on-Sea, Brean and Highbridge Zone 4
- Burnham-on-Sea, Brean and Highbridge Zone 5
- Burnham-on-Sea, Brean and Highbridge Zone 6
- Burnham-on-Sea, Brean and Highbridge Zone 7

MINEHEAD**1. General**

- West Somerset Council is the “lead” Local Authority when this Plan is implemented.
- The flood plain is Minehead that would be caused by tidal flooding.

2. Potential Locations for Silver Control

Avon & Somerset Constabulary, on consultation with the Environment Agency, will designate a Silver Control location. Potential site:

SILVER	OS Sheet	Grid Reference	Remarks
Minehead Police Station	193	SS 97124560	

3. Traffic Management – Location of Signage

SCC Highways will mobilise Skanska (the Service Provider) to deploy traffic management signage to pre-designated locations and adjust the layout plan as the flood situation develops:

Grid Reference	Location	Sign
SS 984 448	Junction Seaward Way from Ellicombe Roundabout	Warning
SS 951 457	A39 Junction of Porlock Road with Periton Road	Warning
SS 978 459	Junction of Seaward Way and Vulcan Road	Road Closed Flooding
SS 973 463	Junction of The Avenue and Glenmore Road	Road Closed Flooding
SS 971 466	Junction Blenheim Road/Northfield Road/Quay Lane/North Road	Road Closed Flooding
SS 970 467	Junction Northfield Road and Church Path	Road Closed Flooding
SS 972 464	Adjacent to No 1 North Road and The Mews	Road Closed Flooding

4. Evacuation Planning – Flood Zones with Associated Roads and Postcodes**Zone 1:**

5. Provisional Rest Centres

District/Borough	MIP Site	Rest Centres
West Somerset	Minehead	Decision will be taken at the time, depending on the size of the flood incident. Possible that WSC will have to request mutual aid from other District/Borough Councils..

6. Major Incident Plan - Maps

The Environment Agency has produced maps indicating the populated area that could become flooded. Where appropriate the floodplain is divided into Zones. Each Zone takes approximately one hour to tour with a public broadcast system to warn residents of impending flood. The following maps are included:

- Minehead All Zones
- Minehead Zone 1
- Minehead Zone 2

7. Butlins Vacation Club Emergency Flood Plan

The Butlins Vacation Club occupies a large coastal site within Flood Zone 1 with a significant number of staff and holiday guests in occupation. As part of their flood response arrangements they:

- Receive Flood Warnings from the Environment Agency.
- On Receipt of “Flood Warning”:
 - Institute a flood warden scheme.
 - Review new arrivals arrangements.
 - Review flood protection/emergency flood plan/business continuity arrangements.
- On receipt of “Severe Flood Warning”:
 - Continue flood wardens scheme.
 - Cancel new arrivals.
 - Deploy flood protection equipment.
 - When alerted by West Somerset Council send a Representative of Butlins Management Team to Silver Control.
 - On advice from Silver Control evacuate all holiday guests and staff before inundation of flood water.

These arrangements will impact on Silver Operations for the safe evacuation of the MIPS Zones with Vacation Club planning figures detailed below:

Factors	Population	Impact on Planning
Staff: Permanent Team	180	Live locally and can be considered in normal Local Authority arrangements.
Seasonal Staff	600 – 1,000	600 - 800 live on-site – may need temporary accommodation as

Factors	Population	Impact on Planning
(90% of year)		“residents”
Resort Guests: 200 Caravan Units	500 – 800	Have own vehicles to self evacuate and advised to return home.
Main Site	3,000 – 5,700	<p>Following planning figures for evacuation:</p> <ul style="list-style-type: none"> • 90% have own transport for evacuation and will travel home. • 10% have no transport, relying on public transport or contracted coaches. May require short-term rest centre until transport can be arranged for travel home. • Small number of guests will be considered “vulnerable” and may require transport to be arranged for travel home. May require short-term rest centre (special facilities).
Rest Centre: Season Staff	600 – 800	Rest Centre/Temporary Accommodation as “residents” in Minehead. Some are foreign nationals but all “English-speaking”
Resort Guests	300 - 570	Temporary Rest Centre may be required until transport arrangements can be made to leave the Minehead area.
Traffic Control/ Management	1,700 – 2,000 cars	SCC Highways Department will have restricted traffic entering flood plain but Butlins evacuation plan will require traffic control to leave the area. Consider need to have vehicle recovery services on standby to assist with breakdowns.

ANNEX E

BRUTON

1. General

- South Somerset District Council is the “lead” Local Authority when this Plan is implemented.
- The flood plain is Bruton threatened by flash flooding of the River Brue and Bruton Dam.

2. Potential Locations for Silver Control

Avon & Somerset Constabulary, on consultation with the Environment Agency, will designate a Silver Control location. Potential sites:

SILVER	OS Sheet	Grid Reference	Remarks
Wincanton Police Station Churchfields	183	ST 71392879	

3. Traffic Management – Location of Signage

SCC Highways will mobilise Skanska (the Service Provider) to deploy traffic management signage to pre-designated locations and adjust the layout plan as the flood situation develops:

Grid Reference	Location	Sign
ST 636 399	B3081 Junction A371	Road Closed Flooding
ST 651 311	A359 East of A371	Road Closed Flooding
ST 688 343	B3081 North of Park Wall Junction	Road Closed Flooding
ST 681 343	A359 South of Railway	Road Closed Flooding
ST 679 346	Junction High Street and Shute Lane	Road Closed Flooding
ST 683 349	Quaperlake Street/Silver Street	Road Closed Flooding

4. Evacuation Planning – Flood Zones with Associated Roads and Postcodes.

Zone 1:

TOTAL			17060*

* Properties at risk listed as being less than 10 are assumed at the mid point of 5 for the purposes of establishing a total.

Annex I

Reservoir Dam Sites.

There are a number of Reservoir Dams within the County:

Ser	Reservoir	Location	Undertaker	LA
1	Bruton Dam Retention	Sheephouse Farm, Bruton OS Sheet 183 ST 699 353	EA	SSDC
2	Chard Reservoir	Chard OS Sheet 193 ST 339 099	SSDC	SSDC
3	Cheddar	Axbridge OS Sheet 182 ST 441 537	Bristol Water Co	SDC
4	Clatworthy	Brendon Hills OS Sheet 181 ST 043 314	Wessex Water plc	TDBC
5	Compton Castle Lake	Compton Pauncefoot Nr Wincanton OS Sheet 183 ST 649 258	Agave Promotions Corporation	SSDC
6	Curry Moor Flood Storage Area	Nr East Lyng OS Sheet No 193 ST 326 270	EA	SSDC
7	Durleigh	Bridgwater OS Sheet 182 ST 270 363	Wessex Water plc	SDC
8	Hawkridge	Aisholt, Quantock Hills OS Sheet 182 ST 208 363	Wessex Water plc	SDC
9	Leigh	Blagdon Hill OS Sheet 193 ST 197 177	Wessex Water plc	TDBC
10	Luxhay	Blagdon Hill OS Sheet 193 ST 202 177	Wessex Water plc	TDBC
11	Norton Fitzwarren Reservoir	Nr Norton Fitzwarren OS Sheet No 193 ST 179 268	Barratts Homes Ltd (South West)	TDBC

Ser	Reservoir	Location	Undertaker	LA
12	Nutscale	Lucott Moor, Porlock OS Sheet 181 Exmoor SS 862 434	Wessex Water plc	WSC
13	Pinkworthy Pond	Nr Lynton, Exmoor OS Sheet 180 SS 723 422	Exmoor National Park	WSC
14	Sutton Bingham	East Coker, Yeovil OS Sheet 194 ST 556 114	Wessex Water plc	SSDC
15	Torr Works Balancing Reservoir	Shepton Mallet OS Sheet No 183 ST 686 433	Aggregate Industries UK Ltd 01373 451001	MDC

Community Recovery Template

RECOVERY TEMPLATE				
SRL	Task	Detail	Responsible Authority	Partner Agencies
001	Communities	How many communities have been affected?		
		How efficient were any community level flood protection schemes?	EA/LA	
		For each community: a. How many properties have flooded?	LA	
		b. Extent of flooding		
		c. How many persons / families have been displaced i. Are they being cared for by LA? ii. Are they still in area? (Family/Friends)	LA	
		d. How efficient were any property level flood protection/resilience schemes?	LA	
		e. Are there major recovery issues?		
002	Businesses	f. How many businesses have been affected?	LA	Chmbr of Commerce
		g. Is there any likelihood of long term consequences? i. Site closure ii. Job losses		
		h. Can LA provide any assistance? i. Business regeneration? ii. Guidance, signposting to support?	LA	
003	Farming`	i. How many farms have been affected?		FWAG, Defra Animal Health, NFU, RSPCA
		j. Are there risks to		

		livestock? (Feeding, housing, movement)		
		k. Are there long terms impacts? i. Soil erosion or damage due to flooding? ii. Loss of livelihood and impact on community? iii. Contamination of land?	LA	EA/District Council
004	Health	l. How many casualties are there?	NHS	Ambulance
		m. Level of long term health and mental health requirements?	NHS/LA	Voluntary Agencies
		n. Impact of demographics? i. Vulnerable ii. Care, Nursing and Rest homes?	NHS/LA	
005	Infrastructure	o. Highways	LA/HA	
		p. Rivers and waterways	EA/LA	Landowners
		q. Critical Local infrastructure i. Hospitals ii. Health sites iii. Emergency Service sites (Police, Fire and Ambulance Stations) iv. Utilities - Gas - Electricity - Water - Sewerage - Communications v. Bus and Train Routes	All Agencies and Utilities	
006	Environment	r. Extent of pollution and contamination	LA/EA	
		s. Effects on special sites (SSSI etc.)	Natural England	EA/SCC
		t. Effects on wildlife.	Natural England	EA/SCC
007	Other issues	Any issue of a local nature		

Operational trigger points for action

Somerset Levels and Moors flood risk management

Background

As part of our contribution towards the Somerset Flood Action Plan, we are developing a set of 'Operational Trigger Points' for the Somerset Levels. This piece of work will help clarify how we manage flood risk in an extraordinary flood event - just like we experienced in winter 2013-14. These Trigger Points will explain when we are able, and decide, to take action at particular sites during an event - and describe what people would see happening on the ground. A summary of what people will expect to see happening at the named sites is outlined in this briefing.

Where are the trigger points?

Eight of our trigger points are at Environment Agency pumping stations. They include bringing in more pumps when certain things happen such as roads flooding. The condition throughout, is that as well as the local trigger being met, for that area there will also be rain forecast for the next 3-5 days (cumulative total of 100 mm or greater) and moor levels rising at 5cm/hour or more.

Pumps in the pumping stations are set to operate automatically according to water levels in the rhynes draining the moor. They cannot pump if there is no space to receive water into the receiving river. When spillways are operating or river banks are overflowing, the pumps cannot operate.

The other two trigger points relate to the use of the River Sowy and Kings Sedgemoor Drain to divert water from the River Parrett.

Currymoor, Saltmoor and Northmoor Pumping Stations

Currymoor, Saltmoor and Northmoor triggers are interlinked. The level on Currymoor rises due to spillways running from the River Tone into Currymoor. This means the pumps can't operate. Cutts Road floods first, and then New Road. The trigger is when New Road floods. At this point additional temporary pumps will be put in earlier and all in one go at;

- 1 Currymoor Pumping Station for the time when pumping can resume;
- 2 Saltmoor and Northmoor Pumping Stations. All pumps can operate on all but the very highest spring tides.

West Sedgemoor Pumping Station

The permanent pumps will operate until the River Parrett reaches a level where Beasley's spillway runs.

Additional temporary pumps will be put in at West Sedgemoor Pumping Station when the lowest roads flood ready for when pumping can resume. When Beasley's Spillway stops running all permanent and temporary pumps will be turned on in sequence

Westover Pumping Station

When flooding is predicted all inlets to the moor will be manually closed and water will continue through the river systems. The permanent pumps will continue to operate automatically until the Parrett overtops its banks upstream.

The Drayton to Muchelney road floods first, then the lowest part of the Westover Trading estate road.

Additional temporary pumps will be put at the pumping station when the Westover Trading estate road floods

Huish Episcopi Pumping Station

When flooding is predicted all inlets to the moor will be manually closed and water will continue through the river systems. The permanent pumps will continue to operate automatically until the River Yeo overtops its banks. The land starts to flood and then flooding reaches the Langport to Muchelney Road, then Muchelney to Long Load road. When the Muchelney to Long Load Road floods, additional temporary pumps will be put at the pumping station to operate once the Yeo is below bank height.

Long Load Pumping Station

When flooding is predicted all inlets to the moor will be manually closed and water will continue through the river systems. The permanent pumps will continue to operate until the River Yeo overtops its banks. The Long Sutton road floods at which time additional temporary pumps will be put at the pumping station. As soon as the river is below bank height pumps will be turned on in sequence to avoid overtopping

Westonzoyland Pumping Station

When flooding is predicted all inlets to the moor will be manually closed and water will continue through the river systems. When flooding occurs and lowest fields flood the permanent pump will operate. When the lowest road in Middlezoy floods an additional 1 cumec pump will be put in at the pumping station. All pumps operate on all but highest tide peaks.

NB no additional pumps can be added at Lakewall.

Sowy and Kings Sedgemoor Drain

When flooding is predicted, Oath Lock is opened. Monksleaze Clyce is opened partially to lower river levels in the Parrett and allow pumping to continue upstream of Langport.

At the onset of flooding, Monksleaze Clyce is closed because Allermoor and Beasley's Spillways will run. (Having the Clyce open AND spillways running may increase the flood risk to Sowy system)

When Parrett levels are declining and spillways are predicted to stop running, Monksleaze Clyce will be fully opened incrementally depending on keeping the Sowy below bank height downstream of Beer Wall as desired by the IDB. Temporary pumps will be put at Dunball before Monksleaze Clyce is fully opened
