# Somerset Minerals Plan - Examination Schedule of Proposed Main Modifications

# SOMERSET County Council

#### HABITAT REGULATIONS ASSESSMENT ADDENDUM

Proposed changes to submission Somerset Minerals Plan

#### October, 2014

The following table analyses the proposed changes to the Minerals Local Plan that have arisen from the consultation which the plan underwent in 2013. Both text and policy changes are considered before any mitigating effects from other policy or text in the Plan. The assessment of each change is given in the right hand column and where the change is uncertain, i.e. a 'no likely significant effect' cannot be ruled out, this is highlighted in orange. Following this assessment those text and policy modifications identified as being 'uncertain' are assessed against counter-acting measures available in the plan as a whole or from avoidance measures through modifications to the wording to policy or text. If the effect of text or policy on European or Ramsar sites remains uncertain at this stage a Stage 2 Appropriate Assessment would be required.

#### Stage 1 – Test of Likely Significant Effect

| Ref | Page | Policy /<br>paragraph | Proposed modification   | Change ref in<br>SD6c (listed<br>only where<br>change is<br>identical) | Legal compliance and/or<br>soundness reason for change(s)<br>(R numbers refer to representor<br>/ representation number) | Assessment  |
|-----|------|-----------------------|---|--|--|---|
| 1   | 26   | 6.35                  | Somerset's crushed rock landbank is<br>predominantly made up of the carboniferous<br>limestone used in construction aggregate,<br>supplemented by higher PSV (polished stone<br>value) igneous rock used for road surfacing.<br>Somerset has a landbank for crushed rock_of | 16   | Factual update to the evidence<br>base (integrating data from the<br>latest Somerset Local Aggregate<br>Assessment)      | No significant effect likely –<br>revised detail only |

| Ref | Page | Policy /<br>paragraph | Proposed modification  | Change ref in<br>SD6c (listed<br>only where<br>change is<br>identical) | Legal compliance and/or<br>soundness reason for change(s)<br>(R numbers refer to representor<br>/ representation number)  | Assessment   |
|-----|------|-----------------------|--|--|---|--|
|     |      |                       | approximately 451 425 million tonnes (20123 figure).   |  |   |  |
| 2   | 26   | NEW<br>PARA<br>6.36   | Somerset's crushed rock landbank is<br>predominantly made up of the Carboniferous<br>Limestone used in construction aggregate,<br>supplemented by higher PSV (polished stone<br>value) Silurian Andesite used for road<br>surfacing. Based on current evidence,<br>approximately 2% of the total crushed rock<br>landbank is Silurian Andesite i.e.<br>approximately 8 million tonnes.   | 17   | To reflect the updated evidence<br>base and accord with Planning<br>Practice Guidance.<br>Recent updates from the<br>operator of Moons Hill Quarry<br>Complex (R41.1) have helped to<br>identify an estimate for the<br>Andesite permitted reserve and<br>alongside feedback from the   | No significant effect likely –<br>textual information only |
| 3   | 26   | 6.3 <u>67</u>         | Based on the level of provision proposed in<br>the Somerset's first-LAA 2014 of 10.8145<br>million tonnes per year, Somerset has<br>sufficient crushed rock reserves for the next<br>401 years. Focusing on Andesite alone,<br>based on current evidence, the Andesite<br>landbank is anticipated to last approximately<br>22 years. However, it should be noted that<br>the LAA will be updated annually and these<br>figures are likely to change in the future in<br>accordance with market demand and<br>permitted reserves. | 18   | South West Aggregates Working<br>Party (SW AWP) supported the<br>maintenance of a separate<br>landbank.<br>PPG Paragraph: 085 Reference<br>ID: 27-085-20140306 states<br>that "Where there is a distinct<br>market for a specific type or<br>quality of aggregate (such as<br>high specification rock, or sand<br>used for concrete or sand for | No significant effect likely –<br>revised text detail only |
| 4   | 26   | 6.39                  | Should Somerset's permitted reserves of<br>crushed rock <u>(either Carboniferous</u><br><u>Limestone or Silurian Andesite</u> ) fall below a<br>15 year supply   | Revised<br>(was 19)  | asphalt), a separate landbank<br>calculation based on provision to<br>that market may be justified for<br>that material or those  | No significant effect likely –<br>textual information only |

| Ref | Page | Policy /<br>paragraph | Proposed modification   | Change ref in<br>SD6c (listed<br>only where<br>change is<br>identical) | Legal compliance and/or<br>soundness reason for change(s)<br>(R numbers refer to representor<br>/ representation number)  | Assessment   |
|-----|------|-----------------------|---|--|---|--|
|     |      |                       |   |  | <i>materials"</i><br>A further amendment proposed<br>during the hearings (to change<br>4) provides additional clarity<br>regarding the maintenance of<br>each separate landbank.  |  |
| 5   | 27   | SMP2                  | The Mineral Planning Authority will seek to<br>maintain make provision for a rolling 15 year<br>landbank of permitted reserves of both<br>Carboniferous Limestone and Silurian<br>Andesite reserves | Revised<br>(was 20)  | Changes to upper case policy<br>have been proposed to align<br>with government policy and<br>guidance. SCC has taken a<br>consistent approach that the<br>revised policy in its entirety<br>would be considered a main<br>modification.<br>In addition to the maintenance<br>of two separate landbanks (as<br>explained in changes 2, 3 & 4<br>above), with wording that has<br>been further clarified in change<br>5 during the hearings, R43/7,<br>R44/8 and R106/11 state that<br>the policy should be clearer<br>about making provision for<br>(rather than seek to maintain<br>provision). | No significant effect likely –<br>revised text detail only |

|     | -    |                       |  |  |  |  |
|-----|------|-----------------------|--|--|--|--|
| Ref | Page | Policy /<br>paragraph | Proposed modification  | Change ref in<br>SD6c (listed<br>only where<br>change is<br>identical) | Legal compliance and/or<br>soundness reason for change(s)<br>(R numbers refer to representor<br>/ representation number)   | Assessment   |
| 6   | 30   | SMP3                  | <ul> <li>Planning permission for the extraction of crushed rock will be granted subject to the applicantapplication demonstrating that:</li> <li>a) the proposal will deliver clear economic and other benefits to the local and/or wider communities; and</li> <li>b) the proposal includes measures to mitigate to acceptable levels adverse impacts on the environment and local communities.</li> <li>Land has been identified as an Area of Search for andesite extraction as shown in policies map 1b.</li> <li>Also see Main Modification 55 and Map 1b below.</li> </ul> | New  | Changes to upper case policy<br>have been proposed to align<br>with government policy and<br>guidance. SCC has taken a<br>consistent approach that the<br>revised policy in its entirety<br>would be considered a main<br>modification.<br>PPG Paragraph: 008 Reference<br>ID: 27-008-20140306 states<br>that Mineral Planning Authorities<br>should plan for the steady and<br>adequate supply of minerals in<br>one or more of the following<br>ways (in order of priority):<br>1. Designating Specific Sites.<br>2. Designating Preferred Areas.<br>3. Designating Areas of Search<br>The size of the crushed rock<br>landbank in itself is considered<br>exceptional and thus Areas of<br>Search for Carboniferous<br>Limestone are not proposed.<br>However, an Area of Search is<br>proposed for Silurian Andesite to<br>align with this guidance. | Uncertain – Area of Search<br>includes the ecological zones of<br>influence of Mells Valley SAC.<br>There would be potential effects<br>on commuting and feeding<br>habitat of horseshoe bats, which<br>are features of the SAC. |
| 7   | 32   | Para 6.77             | 6.77 As a result, Somerset does not have   | 111  | To reflect discussions at the  | No significant effect likely –   |

|-----|------|-----------------------|-----------------------|--|---|------------|
|     |      |                       |                       |  | have limited geological outcrop<br>and geographical occurrence in<br>Somerset, nonetheless it is<br>acknowledged that they should<br>be safeguarded. Three of the<br>four resource areas are already<br>covered by the Plan's current<br>safeguarding areas. Downside<br>Stone is not, and thus an MSA<br>for Downside Stone (also locally<br>called Chilcote Stone) has been<br>added to the existing MSA layer<br>i.e. the building stone<br>safeguarding layer has been<br>slightly expanded (nr Shepton<br>Mallet). |            |
|     |      |                       |                       |  | See Appendix below  |            |

During the screening stage, or other early stages, the plan making authority may be able to introduce counter-acting measures that would obviously avoid the possibility of a significant effect on a European site. This speeds the appraisal process in its early stages and enables the assessors to concentrate on those aspects of the plan that could have significant effects on European sites that are not easily eliminated. It narrows the scope of the appraisal and reduces the time and cost of undertaking it.' (Tyldesley et al, 2012<sup>1</sup>)

<sup>&</sup>lt;sup>1</sup> David Tyldesley and Associates, 2012. Draft Guidance for Plan Making Authorities in Wales: The Appraisal of Plans under the Habitats Directive. <u>http://www.ccgc.gov.uk/landscape--</u> wildlife/managing-land-and-sea/environmental-assessment/habitats-regulations-assessmen.aspx

# Somerset Minerals Plan - Examination Schedule of Proposed Main Modifications

*Measures to avoid, cancel or reduce the effects of a plan on a European site (here referred to as avoidance measures, cancellation measures and reduction measures respectively) should be proposed as part of the plan and the plan making authority will take these into account in the appraisal, often collectively referred to as 'mitigation measures'* (Tyldesley et al, 2012)

*`Avoidance measures eliminate the likelihood of any effects on the European site. Cancellation measures have the effect of cancelling out potentially adverse effects on the European site before their effects are felt. Reduction measures are designed to reduce likely significant effects, perhaps to a level that is insignificant or in a way that makes them unlikely to occur.'* (Tyldesley et al, 2012)

Policies where counter-acting measures, at this stage, do not negate the potential for a significant effect will require a Stage 2 'Appropriate Assessment'.
